

Key Benefits for operators:

- The concept is built around unpredictability and surprise.
- MJ features a three-level system with increasing prize values.
- MJ keeps players immersed with unexpected rewards that boost engagement.
- MJ effectively extends gameplay sessions and encourages higher betting activity.
- The settings allow independent configuration for each of the levels in terms of credit contribution and prize limits.

Key Benefits for players:

- MJ adds excitement with unexpected win potential at any moment during gameplay.
- No specific achievements or tasks required — every bet can trigger a jackpot.
- Three-level system (Gold, Silver, Bronze) caters to different players segments.
- The Bronze level provides more frequent, smaller wins—ideal for casual players, while Silver and Gold tiers offer higher-value rewards for those seeking a bolder experience.
- MJ supports ongoing play by occasionally offering surprise rewards, adding a touch of extra enjoyment.

Jackpot Mechanics

- MJ is triggered completely random during the gameplay.
- No specific combinations or player actions required.

Levels:

- Bronze – Most frequent wins with smaller rewards.
- Silver – Balanced frequency and prize size.
- Gold – Rarest but highest-value prizes.
- Optional 4th level available, depending on campaign setup.
- Customization - Jackpot levels can be individually configured.
- Operators control credit contribution and prize caps per level.

Why to choose?

- MJ offers attractive scale of jackpot accumulations.
- MJ links games of CT Interactive in one jackpot accumulation.
- MJ is available for all casino sites at all endpoints.
- MJ pays out at random during the play on each of the slot games in the CT Interactive category of the Slot section.
- MJ offers a multi-currency support.
- The jackpot level is randomly chosen by the jackpot server with a win probability directly proportional to the bet level on the winning game.
