**BULGARIAN INSTITUTE OF METROLOGY (BIM)
GAMING FACILITIES TESTING LABORATORY**

52 B, G. M. Dimitrov Blvd., 1797 Sofia

Certificate of Accreditation Reg. No. 26 ЛН/30.03.2017 valid through 30.03.2021, extended validity by Order A 173/29.03.2021
Issued by Executive Agency Bulgarian Accreditation Service under the requirements of BDS EN IEC/ISO 17025:2018

PROTOCOL

of Testing of Gaming Software and Communication Equipment for Online Betting
No. KC-075 of 30.07.2021

Name ***Elephant RGS (Remote Game Server)***
Version ***GS 5.1***
Manufacturer ***CT Interactive***
Application to NRA for issuance of a Licence for
Manufacturing, Distribution, and Service
Maintenance No. 26-C-745/31.05.2021

Manufacturing (Serial) Number 1401-201
Year of Manufacture 2021

Applied for by ***CT Gaming AD***
Certificate of the State Commission on Gambling
No. 000030-5463/09.07.2020 for Import,
Distribution and Service Maintenance
Address 7, Kukush Str., city of Sofia
Testing Application Application Ref. No. 000029-29638/29.06.2020
Testing Location: Gaming Facilities Testing Laboratory and Sites of
CT Gaming AD,
7, Kukush Str., city of Sofia
Duration of Testing: Testing Started: 01.06.2021
Testing Completed: 30.07.2021

Testing is performed according to **M 702-6 „Methodology for Testing Gaming Software and Communication Equipment for Online Betting”**, approved on the grounds of **Ordinance on the General Technical and Functional Requirements for Gaming Software and Communication Equipment for Online Betting**, Decree of the Council of Ministers No. 31 of 01.02.2021, promulgated in State Gazette No. 10 of 05.02.2021, and **Ordinance on the Terms and Conditions for Registration and Identification of Participants, Data Storage for Online Betting Organized on the Territory of the Republic of Bulgaria and for Submission of Information on Gambling Games to a Server of the National Revenue Agency**, Directive of the Council of Ministers No. 50 of 15.02.2021, promulgated in State Gazette No. 14 of 17.02.2021.

Laboratory Head:

R. Stoyanov, Physics Engineer

[Seal of the Bulgarian Institute of Metrology]

I. Test results

1. Registration of participants

The gaming software of *Elephant RGS (Remote Game Server)* type *GS 5.1* is designed to provide access to gambling with virtual gambling machines through a Central Computer System of an organizer of online gambling games. The gaming software *Elephant RGS (Remote Game Server)* version *GS 5.1* has no functions for registration of participants. The gaming software *Elephant RGS (Remote Game Server)* version *GS 5.1* automatically provides the necessary information for the proper functioning of the system. *Elephant RGS (Remote Game Server)* version *GS 5.1* does not provide betting via short text message (SMS).

2. Deposits

The gaming software of *Elephant RGS (Remote Game Server)* version *GS 5.1* is designed to provide access to gambling games on virtual gambling machines through a Central Computer System of an organizer of online gambling games. *Elephant RGS (Remote Game Server)* version *5.1* gaming software does not perform deposit and gaming account management functions. The gaming software of *Elephant RGS (Remote Game Server)* version *GS 5.1* automatically provides the necessary information for the proper functioning of the system. Data on the operation and transactions performed by the gaming software of the system are stored in the game server indefinitely. All information is stored on mirror duplicate media - primary and backup server and archived in a server for backup copies.

3. Playing games, betting and winning

3.1 Technical and functional requirements for gaming software

No.	Requirement	Found (measured)	Note
1.	General requirements 1.1. Gaming software: - creates realistic expectations for the participants about their chances of winning by accurately presenting all the results and/or events on which the games are based; bonus games provide a chance to win in a way that does not give the impression to participants that the chance of winning is greater than the chance of winning in betting games; - unequivocally shows whether the participant can influence the outcome of the game(s); - ensures that the games are played according to the rules, approved on the grounds of Art. 17, para. 1, item 4 of the Gambling Act.	The rules for each of the games are displayed by a button on the screen "i". The functions of the video buttons are duplicated by some of the buttons on a standard PC keyboard, described in detail in the rules of the game. The rules of each game can specify the theoretical rate of return.	
	1.2. The game conditions and rules for each gambling game shall be described in detail in the rules of the organizer, approved according to Art. 17, para. 1, item 4 of the Gambling Act. The rules of the game shall be accessible to the participant through the same environment and in the same place used for the games. The Central Computer System shall require the participant to explicitly accept the rules of the game, which cannot be	The server provides the organizer with access to the rules for participation in each of the games, the table of winnings, as well as the number and types of symbols and their functions, possible additional, bonus, free and duplicate games, as well as all restrictions on bets and participation in the game.	

	changed within one game session.																																																																								
	1.3. For games where the bet is made by electronic means of communication, the rules shall be available on the organizer’s website, to which the organizer refers when registering, and the participant confirms that he has read them before placing the bet.	Does not provide the option of betting by electronic means of communication or short text message (SMS)																																																																							
2.	Gaming software shall comply to the following requirements: 2.1. shall provide a return of no more than less than 80 percent of the total bets placed while playing on the virtual gambling machines;	<p>More than 80% for each of the games based mathematical estimation of the deviation of the rate of return compared on submitted by manufacturer to the theoretical (TRTP %) under the following conditions: 95% confidence interval, game with a constant bet.</p> <p>Results of tests performed according to Protocol No. KC-069 dated 28.04.2020 of the Gaming Facilities Testing Laboratory of BIM, (games included is the previous version of the server Elephant RGS (Remote Game Server) version GS 4.8).</p> <table><tr><td>20 Star Party</td><td>min TRTP %: 93.51%</td></tr><tr><td>40 Shining Jewels</td><td>min TRTP %: 93.88%</td></tr><tr><td>40 Treasures</td><td>min TRTP %: 93.88%</td></tr><tr><td>African Magic</td><td>min TRTP %: 88.22%</td></tr><tr><td>Alaska Wild</td><td>min TRTP %: 88.27%</td></tr><tr><td>American Gigolo</td><td>min TRTP %: 89.17%</td></tr><tr><td>Australian Magic</td><td>min TRTP %: 88.17%</td></tr><tr><td>Aztec Empress</td><td>min TRTP %: 88.72%</td></tr><tr><td>Banana Party</td><td>min TRTP %: 88.92%</td></tr><tr><td>Bavarian Forest</td><td>min TRTP %: 88.31%</td></tr><tr><td>Beetle Star</td><td>min TRTP %: 87.77%</td></tr><tr><td>Brilliants Hot</td><td>min TRTP %: 93.51%</td></tr><tr><td>Bye Bye Spy Guy</td><td>min TRTP %: 88.71%</td></tr><tr><td>Columbus Treasure</td><td>min TRTP %: 88.15%</td></tr><tr><td>Combat Romance</td><td>min TRTP %: 87.00%</td></tr><tr><td>Dancing Dragons</td><td>min TRTP %: 93.88%</td></tr><tr><td>Desert Tales</td><td>min TRTP %: 87.70%</td></tr><tr><td>Devil’s Fruits</td><td>min TRTP %: 93.96%</td></tr><tr><td>Disco Babylon</td><td>min TRTP %: 88.40%</td></tr><tr><td>Duck of Luck</td><td>min TRTP %: 88.62%</td></tr><tr><td>Duck of Luck Returns</td><td>min TRTP %: 88.71%</td></tr><tr><td>Gaelic Warrior</td><td>min TRTP %: 88.62%</td></tr><tr><td>English Rose</td><td>min TRTP %: 87.91%</td></tr><tr><td>Forest Nymph</td><td>min TRTP %: 87.91%</td></tr><tr><td>Fortune Fish</td><td>min TRTP %: 93.56%</td></tr><tr><td>Full of Luck</td><td>min TRTP %: 88.72%</td></tr><tr><td>Fusion Fruit Beat</td><td>min TRTP %: 93.60%</td></tr><tr><td>Golden Acorn</td><td>min TRTP %: 93.88%</td></tr><tr><td>Golden Flower of Life</td><td>min TRTP %: 93.80%</td></tr><tr><td>Groovy Automat</td><td>min TRTP %: 92.17%</td></tr><tr><td>Horse Race</td><td>min TRTP %: 94.00%</td></tr><tr><td>Island Vacation</td><td>min TRTP %: 89.16%</td></tr><tr><td>Jade Heaven</td><td>min TRTP %: 87.70%</td></tr><tr><td>Jaguar Warrior</td><td>min TRTP %: 93.70%</td></tr><tr><td>Jolly Beluga</td><td>min TRTP %: 87.42%</td></tr></table>	20 Star Party	min TRTP %: 93.51%	40 Shining Jewels	min TRTP %: 93.88%	40 Treasures	min TRTP %: 93.88%	African Magic	min TRTP %: 88.22%	Alaska Wild	min TRTP %: 88.27%	American Gigolo	min TRTP %: 89.17%	Australian Magic	min TRTP %: 88.17%	Aztec Empress	min TRTP %: 88.72%	Banana Party	min TRTP %: 88.92%	Bavarian Forest	min TRTP %: 88.31%	Beetle Star	min TRTP %: 87.77%	Brilliants Hot	min TRTP %: 93.51%	Bye Bye Spy Guy	min TRTP %: 88.71%	Columbus Treasure	min TRTP %: 88.15%	Combat Romance	min TRTP %: 87.00%	Dancing Dragons	min TRTP %: 93.88%	Desert Tales	min TRTP %: 87.70%	Devil’s Fruits	min TRTP %: 93.96%	Disco Babylon	min TRTP %: 88.40%	Duck of Luck	min TRTP %: 88.62%	Duck of Luck Returns	min TRTP %: 88.71%	Gaelic Warrior	min TRTP %: 88.62%	English Rose	min TRTP %: 87.91%	Forest Nymph	min TRTP %: 87.91%	Fortune Fish	min TRTP %: 93.56%	Full of Luck	min TRTP %: 88.72%	Fusion Fruit Beat	min TRTP %: 93.60%	Golden Acorn	min TRTP %: 93.88%	Golden Flower of Life	min TRTP %: 93.80%	Groovy Automat	min TRTP %: 92.17%	Horse Race	min TRTP %: 94.00%	Island Vacation	min TRTP %: 89.16%	Jade Heaven	min TRTP %: 87.70%	Jaguar Warrior	min TRTP %: 93.70%	Jolly Beluga	min TRTP %: 87.42%	Presented by the manufacturer CT Interactive Par Sheets for each of the games for all possible settings of TRTP %,

	2.2. shall automatically limit the number of playing places on the virtual gaming table or the virtual gambling machine depending on the number of simultaneous gaming sessions as requested by the organizer in the application for issuance of a license;	No limit on the number of simultaneous game sessions due to the characteristics of the games.																																																																													
	2.3. shall guarantee a minimum duration of at least three seconds for each gaming session, excluding virtual gambling machine games;	Virtual gambling machines - no restrictions on the minimum duration of the gaming session																																																																													
	2.4. shall ensure that participation in each game is	For the acceptance of the bet a																																																																													

	the result of the explicit consent of the participant;	mandatory confirmation is required when making the bet using the “START” button	
	2.5. shall provide the participant with the opportunity to perform “clicks” on images such as “play”, “hold”, “draw”, “double”, etc., only in cases where the participant has had sufficient time to assess the consequences of his action;	The user interface (video buttons, duplicated by some of the buttons on a standard PC keyboard) is functioning properly according to the functions described on the available buttons and according to the technical documentation.	
	2.6. shall ensure the option of conducting the games and the results of the games shall not depend on the characteristics of the client’s equipment and/or the communication channel;	The server allows each participant who has made a connection with the CCS through the organizer’s website and made an initial registration to have access to all functions of the system and to play the game. Once this access has been granted, the operation of the CCS does not depend on the characteristics of the client’s equipment and/or communication channel. A prerequisite is that the client access device is compatible with the communication channel used.	
	2.7. shall enable games that involve simulating a physical object (dice, roulette wheel, etc.) to give true and fair results is in line with expectations of that physical object.	There are no games involving simulation of a physical object.	
3.	Gaming software shall provide: 3.1. the rules (including restrictions on games and the way the player plays) are accessible from all pages of the game; 3.2. the name of the game shall be displayed on all pages related to the game; 3.3. the balance on the participant’s gaming account shall be displayed or available on all pages of the game; 3.4. the participant shall be provided with information about the amount of the bet made for each individual game.	Visually, accurately and clearly visualize all the necessary information for the game through the fields on the screen and buttons to access the relevant information.	
4.	The Central Computer System (CCS): 4.1. shall provide clear and unambiguous information for the currency in which the bets are made at the time of loading the player’s gaming account, as well as the exchange rate in case of need for currency exchange; 4.2. shall display all possible winning combinations in graphical form and/or text box, with the exception of gambling games with bets on results of sports competitions and races with horses and dogs and gambling games with bets on random events	Visually, accurately and clearly visualize all the necessary information for a game via a button on the game screen or on the home page of the game.	

	and bets related to the guessing of facts; 4.3. shall clearly display the minimum and maximum bets that can be made on the game; 4.4. shall provide participants with information on how to generate and pay out winnings.		
5.	In the current game, the CCS shall display: 5.1. the results from the game until its completion in a clear and comprehensive way; 5.2. the winnings in a clear and unambiguous way; 5.3. only the winning combinations that the client can win with the selected bet, except for gambling games with bets on sports and horse and dog races and gambling games with bets on random events and betting on guessing of facts.	Visually, accurately and clearly visualize all the necessary information for the implementation of the game through the fields on the screen for the implementation of the specific game and a graphical representation of the winning combinations.	
6.	The Central Computer System shall provide the participants with information in connection with their participation in the games in Bulgarian language, regardless of the communication channel used.	The function is performed by the CCS. The rules for the implementation of each of the games are available in the Bulgarian language.	

3.2. Additional requirements to the games of the virtual gambling equipment

No.	Requirement	Found (measured)	Note
1.	Visualization and information about the games 1.1. The gaming software shall display all games on the virtual gambling machines in a clear and specific way.	The server provides an opportunity through the CCS of the organizer to access each of the active games through separate fields/buttons with a unique name and a specific graphic layout for unique identification. When choosing a specific game, the user interface allows detailed information on the game type, the way of making basic and special bets and the possible winnings and premium jackpots, if the game participates in their formation and distribution.	
	1.2. The winnings for each symbol or combination of symbols shall be located in a place that has a visual connection with the corresponding symbol, such as: - the number of symbols that lead to a pay-out shall be displayed; - symbols falling on the same winning scale shall be placed in an area associated with that winning scale; - if it is possible to win a winning with different combinations of symbols, the illustration shall clearly show the combination; - the symbol has a shape and colour that are used unchanged in any game, except when using	The server provides an opportunity through the CCS of the organizer for visualization of all the information about the symbols and winnings for each game separately. Each game uses a different set of symbols and table of winnings, correctly described in the displayed rules. When selecting a specific game, the name and a button for access to the screen are displayed, allowing detailed information on the game type and the table of winnings, as well as the number and	

	animations.	types of symbols and their functions and possible additional, bonus, free and doubling games and distribution of jackpot bonuses, if available for the game.	
	1.3. The gaming software shall graphically display the maximum bet, the possible number of bets to bet on each selected line, and the total number of possible lines.	Message from the home page of the game about the maximum allowable bet. Graphic colour indicator for the bet, sound and graphic or animated signal to reach the maximum bet upon choosing. Graphic and colour indicator for each active line when it is activated. Displaying the total number of active lines. Complete information about the number and location of available lines in the rules of each game.	
2.	Gaming software requirements for card games: 2.1. The game shall clearly show the values and colour of the faces of the playing cards. 2.2. The game shall display the number of the decks to be used if more than one deck is used. 2.3. The game shall reproduce clearly all possible events and results provided for the respective card game and the rules of the organizer under Art. 17, para. 1, item 4 of the Gambling Act.	Requirement not applicable	
3.	When playing roulette, the gaming software shall visually reproduce the roulette wheel.	Requirement not applicable	
4.	Gaming software requirements for dice games: 4.1. In dice games, the gaming software shall visually reproduce traditional dice. 4.2. If the dice used are not traditional, information on this shall be contained in the rules of the game, describing the design of the dice.	Requirement not applicable Requirement not applicable	
5.	Requirements to the Central Computer System when forming a premium jackpot: 5.1. The actual funds that are transferred to the jackpot shall correspond to the allocations determining the jackpot in question, specified in the rules under Art. 22, para. 1, item 11 of the Gambling Act; these funds may not exceed 5 percent of each bet for the virtual gambling machines or the percentage of each bet specified in the rules under Art. 22, para. 1, item 11 of the Gambling Act, for the other virtual games.	Through the module RGS Buffalo JP server; Mystery Premium: Allocations accumulate quickly, correctly and completely in the jackpot. Up to 4 progressive premium levels, each with its own starting value, starting and ending value to win, limit on the accumulation and winning bet and allocation rate. The amount of allocations for all active levels of the jackpot does not exceed 5%. HOT LUCK Premium: Allocations accumulate quickly, correctly and completely in the	

		<p>jackpot. Three progressive and one fixed premium level, each with its own initial value, and allocation rate.</p> <p>The amount of allocations for all active levels of the jackpot does not exceed 5%.</p>	
	<p>5.2. a game that forms more than one premium jackpot, each with its own allocation, the total amount of allocations from each bet shall not exceed the percentage under item 5.5.1;</p>	<p>On the settings page, the sum of all allocations for all 4 progressive Mystery premium levels cannot be more than 5%.</p> <p>On the settings page, the sum of all allocations for all 3 progressive HOT LUCK premium levels cannot be more than 5%.</p>	
	<p>5.3. the current value of the premium shall be visualized in the user interface of each game involved in its formation;</p>	<p>In the interface of the game there are fields for visualization of the current state of the 4 progressive levels of the Mystery premium, in the formation and distribution of which it participates (when the jackpot is active for this game).</p> <p>In the interface of the game there are fields for visualization of the current state of the 3 progressive levels of the HOT LUCK premium, in the formation and distribution of which it participates (when the jackpot is active for this game). The total value of the fixed bonus HOT LUCK is announced in the rules of the respective game.</p>	
	<p>5.4. when the condition for winning the premium is the formation of a winning combination related to certain conditions (bet, denomination, line of formation, etc.), these conditions shall be described in the rules of the game; when the game forms more than one jackpot with a condition for winning - formation of a certain winning combination, the rules of the game shall unambiguously determine which of them under what conditions can be won;</p>	<p>Requirement not applicable</p> <p>The formed jackpot bonuses are of the Mystery type, and are activated at random and not related to the formation of a winning combination in the main game.</p>	
	<p>5.5. when the jackpot replaces any winnings from the game's table of winnings, the starting value after winning them is not lower than the replaced winnings, taking into account the bet and denomination;</p>	<p>Does not replace winnings from the game's table of winnings.</p>	
	<p>5.6. winning the premium shall be associated only with participation in the game, under pre-determined conditions by configuring the jackpot (bet, time, initial and final value of accumulation, etc.), without being associated with the formation of a certain winning combination - premium</p>	<p>Premium Mystery - the system randomly determines one of the active participants participating in the game who fulfil the pre-set conditions for winning, and directly pays the respective level by adding</p>	

	mystery jackpot;	the amount to the credit. Premium HOT LUCK - the system randomly determines one of the active participants participating in the game who fulfil the pre-set conditions for winning, and starts the additional game to determine one of the 3 progressive levels, which will be won. Pays directly the respective earned level by adding the amount to the credit. The scatter winnings from the HOT LUCK premium are paid out by adding the amount to the credit.	
	5.7. when the distribution of the premium or premium jackpot levels is to be determined by an additional bonus game (outside the table of winnings of the main game), carried out in the interface of the game or in an additional interface, access to this game shall be carried out by forming a certain winning combination or randomly;	HOT LUCK - an additional game that interrupts the main game after all winnings have been paid. Starting the additional game guarantees winning one of the three progressive bonus levels. The result of the additional game determines the level won.	
	5.8. when the premium is conditional on winning in the formation of a certain winning combination, opportunity for changes in the configuration parameters shall be provided only after winning it; when the premium is a Mystery with more than one level of accumulation, the amounts accumulated in them shall be preserved upon change of configuration parameters;	The accumulations on the jackpot cannot be changed after its commissioning. When changing the configuration parameters the amounts accumulated in the jackpot levels are preserved. Changes to the configuration parameters of the premiums in the RGS Buffalo JP server module are made through the RGS Buffalo application with limited access and additional authorization in the Settings menu when selecting the respective jackpot.	
	5.9. when a jackpot is won, in each game session associated with that jackpot, there shall be an indication of the occurrence of that event.	Information is sent to all jackpot-related sessions.	
6.	Additional requirements when forming a premium jackpot. 6.1 The gaming software shall ensure that the jackpot parameters cannot be changed until the end of the current game of each participant who plays for the given jackpot.	The current level of the jackpot of the game is taken from the beginning of the session and is accumulated and won according to the rules from the moment the game starts. All changes in the configuration during the game will be reflected only in the next session of the player.	
	6.2. The replacement of the jackpot system takes effect after winning the current jackpot.	Replacement or deactivation of a jackpot can be done only after winning it, if the deactivation is pre-configured,	

7.	Preview and information about the premium jackpot 7.1. The gaming software shall ensure that the amount of the current jackpot is displayed on the equipment of all participants for a maximum interval of 30 seconds.	Through the module RGS Buffalo JP server: Updated every 2 seconds	
	7.2. The gaming software shall clearly indicate whether the participant is playing for a jackpot.	The system visualizes only the active levels of the jackpot and the participant plays only for the levels that are visualized.	
8.	Additional information about the premium jackpot generated by the Central Computer System 8.1. The gaming software shall maintain a detailed and comprehensive log, which is subject to an information security audit and records the current status of the jackpot, including the following information; - date and time of each event; - configuration; - amount of accumulated allocations; - winnings; - access of authorized personnel; - type of event/action.	The system makes all records in real server time UTC + 0 without corrections. Through the Buffalo Reports section of the RGS Reports application, the relevant information is accessed through the main menu in the following references, having the necessary authorization - date and time of each event - Buffalo Reports/Hits; - configuration and amount of accumulated allocations - Buffalo Reports/Jackpot Levels Account; - winnings - Buffalo Reports/Hits; - access of the authorized staff and type of event/action - Buffalo Reports/Audit.	
	8.2. The gaming software shall store the status of the jackpot on a duplicate technical medium, with a high degree of data protection.	All information about the jackpots is stored on mirrored duplicate media - main and backup server and is archived in the backup server.	
	8.3. The gaming software shall reproduce the information about the amounts of the premium jackpot and the jackpot winnings based on the amount of the bet made by the participant for the formation of the jackpot.	The current state of all premiums and their formation and distribution is visualized in the field of each game. Through the RGS Reports application, when accessing with the necessary authorization in the Buffalo Reports section, when selecting the Hits report, information about each of the won premiums is displayed with date and time of each event, winning amount and winning bet.	

3.3. Gambling games management.

No.	Requirement	Found (measured)	Note
-----	-------------	------------------	------

1.	<p>Activation and deactivation of games and participants</p> <p>1.1. The Central Computer System shall have the means to immediately activate and deactivate individual games, all games and each participant.</p>	<p>The server provides an opportunity upon request of the organizer or through a specialized application in case of authorized access, for activation and deactivation of the access of users to the games for which it is authorized for use. The function is available through the RGS Monitor menu “Games” with a change of the status Activate/Deactivate or Remove game. The CCS of the organizer can be authorized to access only part of the games available through the server.</p> <p>Deactivation of participants is carried out by the CCS of the organizer. The server supports a unique Player ID for each participant.</p>	
	<p>1.2. The information regarding the activation and deactivation under item 4.1.1 shall be stored in a register.</p>	<p>The server automatically provides the CCS of the organizer with the necessary information for activation and deactivation for the formation of the respective register.</p> <p>The server maintains its own service log file - Load Audits/All button for the actions of each authorized user and for the changes made.</p>	
	<p>1.3. When a game is deactivated, it shall be unavailable and displayed as unavailable throughout the deactivation period.</p>	<p>The server does not provide access to the game deactivated through the CCS by the order of the authorization.</p>	
	<p>1.4. When a game is deactivated, the participant can complete all other games started and running at the time of deactivation.</p>	<p>Access authorization is given separately for each game. All games authorized for access are active and can be played independently of the deactivated games.</p>	
	<p>1.5. When a multi-stage game (i.e. a multi-step game) is deactivated, the participant shall complete the started game until all stages have been completed. If this is not possible, participants shall be informed of this circumstance by the CCS, and information about the game shall be kept.</p>	<p>When a game is deactivated, the server immediately disables the start of new sessions and allows the end of all active sessions of the game that has been deactivated.</p>	
2.	<p>Unfinished games</p> <p>2.1. The Central Computer System shall allow the participant to complete any unfinished game. The game shall be considered incomplete in the following cases.</p> <ul style="list-style-type: none"> - Loss of connection, except for the cases of conducting a game under Art. 60 and 62 of the Gambling Act; 	<p>The server provides the ability to complete any unfinished game from the moment of interruption.</p>	

	<ul style="list-style-type: none"> - reboot of the system; - deactivation of games; - restarting the participant's system and retrying the participant's access to the system; - exclusion of a participant for reasons beyond his control. 		
	2.2. After eliminating the reasons for not completing the game under item 4.1.2., the CCS shall display the unfinished games of the participant. When a participation in a game with more than one participant or a tournament game is terminated for reasons other than those attributable to the CCS, the game shall not be considered incomplete for the participant in question.	The server automatically terminates each unfinished game after eliminating the reasons for its interruption.	
	2.3. The Central Computer System shall provide reporting of all unfinished games and provide information to the participant about the status of these games and the status of player's bets.	<p>The server automatically provides the CCS of the organizer with the necessary information for all unfinished games.</p> <p>The server stores information about all unfinished games, regardless of the reason. The information is available through the RGS Reports application in the Unfinished/Problematic games section and detailed references in Integration Audit with filter Gameplay is Finished - No.</p>	
	2.4. Bets that are blocked in unfinished games that can be completed shall be stored in a separate system account until the end of the game. Incomplete games shall be displayed separately in the game account of participants	The server stores all information about bets blocked in unfinished games until they are completed in a separate account and automatically provides the CCS of the organizer with the necessary information.	
	2.5. The manner for completion of the unfinished games and the conditions for refund of the bet made by the participant in the cases of unfinished games shall be ensured by the organizer under the rules of Art. 17, para. 1, item 4 of the Gambling Act. The period for decision of the organizer regarding the unfinished games shall not be longer than 30 days.	The server provides an opportunity through the CCS of the organizer for automatic termination or for termination according to the rules of the respective game and the organizer.	
	2.6. If the CCS cannot ensure the completion of an unfinished game, it shall calculate all amounts due to the participant.	The server provides an opportunity through the CCS of the organizer for automatic termination or for termination according to the rules of the respective game and the organizer, providing information on all amounts due.	
3.	Error handling		
	3.1. The Central Computer System shall contain an error handling procedure.	The server automatically provides the CCS of the organizer with the necessary information about all system errors that occurred during	

		the operation and provides visualization of errors in the game interface.	
	3.2. The Central Computer System shall record all system errors, including reasons for their occurrence and ways of solving.	The server automatically provides the CCS of the organizer with the necessary information. The server stores detailed information - RGS Reports, System Audit section.	
	3.3. A system error shall be considered as change in the system due to factors excluding human intervention, violating its integrity and functionality.	All interruptions during gaming sessions are reflected in the information for the session - RGS Reports, System Audit section.	
		Accounting/Search/Sessions. Detailed information is provided through the Accounting/Crashes section.	
	3.4. The Central Computer System shall generate a report based on the data collected under item 3.3.2.	The system automatically provides the CCS of the organizer with the necessary information to generate reports. All RGS Reports registers on the server allow the generation of reports in CSV or xlsx formats using filters and for a selected time interval via the “Display report” button from the menu.	
4.	Additional requirements 4.1. The Central Computer System shall not allow participants to play against themselves. The ways to prevent such a possibility are described in the rules of the organizer under Art. 17, para. 1, item 4 of the Gambling Act.	The server does not provide an opportunity due to the characteristics of the games.	

3.4. Using random number generators (RNG)

No.	Requirement	Found (measured)	Note
1.	Games in which the results are based on a random principle shall be based on a random number generator, which has been tested by a laboratory included in the list under Art. 20, para. 1, item 4 of the Gambling Act.	The game server <i>Elephant RGS</i> uses a random number generator RNG v6316, manufactured by CT Gaming AD, tested by BMM testlabs, Spain (Evaluation Report No. RNG.BUL.CATE.1014.01.01/03.07.2020). Checksums (SHA1) of critical modules; (Via RGS Monitor interface, Server Version button) LinuxUrandom, pm: D6893CAA6F2B2A8414C67BA2140F08C19D3C73CE LinuxUrandomQueue.pm: DEE2C8460E56767EAA7EEB776	

		F176EECBA00CEF7 RNG.pm; B5ADAA3D6C44132799960B3688 9B2D9224553EF8	
2.	Remote gaming in which a gaming table in a casino is used as a random number generator 2.1. For gambling games in online betting and games through other electronic means of communication that use a gaming table in a gambling casino as the RNG, the general obligatory gambling conditions and rules for gambling games in a gambling casino shall be applied according to the ordinance under Art. 17, para. 3, item 1 of the Gambling Act and the rules approved by the executive director of the National Revenue Agency on the grounds of Art. 17, para, 1, item 4 of the Gambling Act.	The server does not use a gaming table in a land-based casino as a random number generator.	
	2.2. The gaming tables of a gambling casino shall be of type and modification, entered in the register under Art. 20, para. 2 of the Gambling Act.	The server does not use a gaming table in a land-based casino as a random generator numbers.	
	2.3. The Central Computer System shall automatically limits the number of playing places on the virtual gaming table depending on the number of simultaneous gaming sessions requested by the organizer when issuing a license.	The server does not use a gaming table in a land-based casino as a random number generator. No limit on the number of simultaneous gaming sessions due to the characteristics of the games.	
	2.4. Gambling equipment from the land-based casino shall be used only as a RNG. The virtual gaming table can have its own virtual RNG for the various games (roulette, card games, dice, etc.)	Requirement not applicable	
	2.5. Requirements to video surveillance when using gaming tables in a gaming casino: - the Central Computer System for gambling, where a casino table is used as RNG, shall include video surveillance; - video surveillance shall be done in a way to provide evidence of compliance with the rules of the game and to identify any deviations; - video surveillance shall provide information about the date and time of each event.	Requirement not applicable	

4. Registers for the functioning of the systems

No.	Requirement	Found (measured)	Note
1.	1.1 The Central Computer System shall contain and store the following information: - all participants' gaming sessions;	The functions are performed by the CCS of the organizer - The information is also stored in the registers of the <i>Elephant RGS</i> server (<i>Remote Game Server</i>) version <i>GS 5.1</i> . Detailed information about each player and each game is available via the RGS	

		Reports application Reports/Spin by spin section with filters - Player ID, an individual number of the game Spin ID and time interval.	
	- username of participants, password in encrypted form, IP address or number of the electronic means of communication from which the registration for participation was made, and history of changes in these data;	The functions are performed by the CCS of the organizer. IP addresses are recorded at RGS Reports section Reports/Players Session	
	- all gaming accounts (active and deactivated), reflecting the deposited funds, bets made and the paid out winnings of participants;	The functions are performed by the CCS of the organizer. The <i>Elephant RGS (Remote Game Server)</i> version GS 5.1 provides the CCS with the necessary information for the correct recording of bets made and winnings paid out.	
	- all data transfers between the profiles of registered users and individual games;	The functions are performed by the CCS of the organizer. The <i>Elephant RGS (Remote Game Server)</i> version GS 5.1 provides the CCS with the necessary information to properly record bets and winnings. The information is stored in the registry on the server and is accessible through the RGS Reports application Reports/By Games section with filter Player ID and time interval.	
	- all adjustments, bonuses and other actions affecting the amounts in the gaming accounts	The functions are performed by the CCS of the organizer. The <i>Elephant RGS (Remote Game Server)</i> version GS 5.1 stores information and provides the CCS with the necessary information to properly reflect the actions on all adjustments and bonuses.	
2.	2.1. The Central Computer System shall generate reports on: - all client registrations; - all registered participants with information about their gaming accounts, as well as the date of registration	The functions are performed by the CCS of the organizer. The <i>Elephant RGS (Remote Game Server)</i> version GS 5.1 does not perform client registrations. The <i>Elephant RGS (Remote Game Server)</i> version GS 5.1 provides the CCS with the necessary information to properly display the client account information.	
3.	3.1. The information under item 1.1. shall be subject to audit of information security according to the Ordinance on the minimum requirements for network and information security, adopted by Decree No. 186 of the Council of Ministers of 2019 (SG, issue 59 of 2019).	The manufacturer CT Interactive has a valid certificate for compliance with the requirements of ISO/IEC 27001:2013.	Certificate No. 01 153 2120070, dated 25.06.2021 issued by

			TUV Rheinland Cert. GmbH
4.	<p>Information about participants and client sessions</p> <p>4.1. The actions of the participant during the client session shall be recorded in a register as information about the session.</p>	<p>The <i>Elephant RGS</i> (Remote Game Server) version <i>GS 5.1</i> automatically provides the CCS of the organizer with the necessary information for the client sessions. The information is also stored in the server logs in the Reports/Spin by spin sections of the RGS Reports application separately for each game with identification by the individual username of each participant and game number and filters by time period.</p>	
	<p>4.2. The Central Computer System of the organizer shall store information and allow for generating an excerpt from the database for the client session, the participant and the games according under the requirements of the Ordinance under Art. 17, para, 3, item 6 of the Gambling Act,</p>	<p>The system automatically provides the CCS of the organizer with the necessary storage information. The <i>Elephant RGS</i> (Remote Game Server) version <i>GS 5.1</i> allows the generation of excerpts from the own databases in CSV or xlsx formats using filters for a selected time interval via the “Display report” button from the menu.</p>	
	<p>4.3. The Central Computer System shall store the following information about the client session:</p> <ul style="list-style-type: none"> - client identification number; - start and end date and time of the session; - IP addresses or numbers of the electronic communications from which the participant accessed the session; - total amount bet during the session, - total bet on which winnings are accumulated during the session; - total amount that was deposited in the gaming account during the session (with time recording); - total amount that was withdrawn from the gaming account during the session (indicating the time); - start and end date and time of the participant’s game session; - reason for the end of the session, - information about the game during the session, 	<p>The server automatically provides the CCS of the organizer with information about the client’s ID number, start and end time of the session, IP addresses from which the participant accessed the session, total amount that was bet during the session, total bet amount at which are accumulated winnings during the session, total amount that was deposited in the gaming account during the session (indicating the time), total amount that was withdrawn from the gaming account during the session (indicating the time), date, time and duration of the participant’s game session, reason for the end of the session, information about the game during the session.</p> <p>The information is received and sent according to unique request codes and Player ID generated by the CCS, and is uniquely identified.</p>	
	<p>4.4. The Central Computer System shall store the following information about the participant:</p>	<p>The server automatically provides the CCS of the organizer with the</p>	

	<ul style="list-style-type: none"> - information for determining the identity of the participant; - information and the balance and movement on the gaming account; - deactivated gaming accounts and the reason for their deactivation. 	necessary information needed to reflect changes in client accounts.	
	<p>4.5. The Central Computer System shall store the following information for each participant's game session:</p> <ul style="list-style-type: none"> - identification data of the participant; - identification of the game and its variant; - information about the games played by the participant; - starting time of the game; - balance at the beginning of the game; - bet (indicating the time when it was made); - game status (current, completed, unfinished, etc.); - exit from the game (with indication of time); - jackpot winnings (if applicable); - game completion time; - winnings; - gaming account balance at the end of the game; - all the games that weren't completed, and the reason for this. 	<p>The server automatically provides the CCS of the organizer with all the information. The information is received and sent according to unique request codes and Player ID generated by the CCS, and is uniquely identified.</p> <p>The server also stores detailed information Reports/Spin by spin section of the RGS Reports application with filters by Player ID, individual game number (Spin ID) and time interval.</p>	
	<p>4.6. The Central Computer System shall store information about the following events;</p> <ul style="list-style-type: none"> - financial transactions - deposits or withdrawals equal to or exceeding EUR 15,000 or their BGN equivalent, regardless of whether the transaction was carried out through one operation or through several related operations; - changes made in the parameters of the games; - changes made to the jackpot parameters; - new jackpots; - jackpot pay-out; - elimination of the jackpot; - creation/establishment of a gaming account by the participant, as well as its deactivation/closing; - changes made to the information for the participant; - loss of communication with the participant's equipment. 	The server automatically provides the CCS of the organizer with all the information about the changes in the monitored parameters. The information is received and sent according to unique request codes and Player ID generated by the CCS, and is uniquely identified.	
5.	<p>Additional requirements</p> <p>5.1. The Central Computer System shall maintain a register of all participants in the games under Art. 71, para, 2 and Art. 73 of the Gambling Act.</p>	The function is performed by the CCS of the organizer, <i>Elephant RGS</i> (Remote Game Server) version <i>GS 5.1</i> does not provide access to gambling games and tournaments organized in a gaming casino.	

5. Protection and storage of information.

No.	Requirement	Found (measured)	Note
-----	-------------	------------------	------

1.	The Central Computer System of the organizer shall provide:		
	1.1. continuity of the work process in case of power failure;	The main and backup servers are located in air-conditioned rooms, with uninterruptible power supply in specially built spaces of Data Centre type.	
	1.2. maintaining a register for the functioning of the system and generating reports based on the register;	The server monitors its operation through the RGS Monitor system and through the built-in functions of the VMware environment and the application of the NAKIVO system. Each of the systems stores the records, which are available to the staff with the respective authorization.	
	1.3. recognizing and preventing unauthorized access and activating unauthorized and/or malicious code.	PFSense firewall based system, Shorewall, providing the connection to the CCS, and the built-in functions of the environment VMware system NAKIVO.	
	1.4. uninterrupted remote access of the bodies of the National Revenue Agency and the State Agency "National Security" to the control local server under Article 6, paragraph 4 of the Civil Procedure Code.	The functions are performed by CCS Elephant RGS (Remote Game Server) version GS 5.1 and provide access to an authorized user of the organizer to the information provided through the application RGS Reports.	
2.	Information protection.	The functions are performed by the CCS	
	2.1. The Central Computer System shall be designed in such a way that the servers (financial and/or gaming) in the same broadcast domain do not allow for alternative network paths overcoming the firewall.		
	2.2. The firewall has restrictive, securing, controlling, security functions and access to it shall be carried out only through the accounts of related administrative users.	The functions are performed by the CCS	
	2.3. Access to the firewall shall be restricted to workstations within the base configuration.	The functions are performed by the CCS	
	2.4. The firewall shall reject and prevent packets of data and/or commands that are requested outside the base configuration.	The functions are performed by the CCS	
	2.5. Each firewall shall maintain a log subject to control and audit, which contains all successful and unsuccessful connection attempts and changes in the parameters that affect the connection permission.	The functions are performed by the CCS. The server also supports LOG files for the operation of its firewalls.	
3.	Transmission of data		
	3.1. All data sent via public networks shall be encrypted.	SSL/https for connection to CCS. The connections between the main and backup server is in a closed internal network.	
	3.2. All connections between geographically	The connection between the	

	dispersed systems shall require identification, authorization and verification.	system's servers and the CCS is limited by IP address and by SSL/https or SSH certification.	
	3.3. All communications between geographically dispersed systems shall be protected against: - incomplete transmission; - incorrect routing and unauthorized receipt of messages; - unauthorized change of messages; - unauthorized disclosure of information; - unauthorized duplication of messages; - unauthorized booting of the CCS.	The connection between the system's servers and the CCS and between the system's distributed components via SSL/https or SSH provides the necessary protection. The system monitors the quality of the connection and automatically switches the use of the connection channels,	
	The organizer of gambling games shall use a secure primary DNS (Domain name system) as well as a secondary DNS that is physically separate from the primary.	The functions are performed by the CCS	
	The Central Computer System shall maintain registers of information security events subject to an information security audit. The information in the registers shall be archived every 6 months and stored for at least 5 years.	The functions are performed by the CCS. Data on the operation of Elephant RGS (Remote Game Server) version GS 5.1 is stored in a database of the main and backup server ("Fail over" procedure of VMware environment) and in an additional replicating copy of physically separated media in the Data Centre of the system and archived according to the manufacturer's procedure through the NAKIVO system.	

6. Authorization and access of employees and users

6.1. Access control

The gaming software of Elephant RGS (Remote Game Server) version GS 5.1 does not perform functions for access control and authorization of participants. The gaming software of the system automatically provides the necessary information for the proper functioning of the system by processing and returning each request individually according to the identification codes sent by the CCS. The CCS does not have access to the administrative functions of the system. The gaming software of Elephant RGS (Remote Game Server) version GS 5.1 supports an access interface with definition of administrative groups and individual users with personalization of each user with a username and password for access with repeatability check. The access is performed only by pre-defined users with precisely defined levels of authorization. Access to the administrative functions of the RGS QA Server module requires additional separate authorization. Elephant RGS (Remote Game Server) version 5.1 gaming software does not have access to participant data, gaming accounts, special rights and privileges.

No.	Requirement	Found (measured)	Note
1.	Participant access 1.1. The organizer of gambling games shall introduce a strict policy to identify, authorize and verify the participant's right of access.	The functions are performed by the CCS of the organizer.	
	1.2. The Central Computer System shall terminate the participant's access to the system in case he is not active for a certain period of time during a	The functions are performed by the CCS of the organizer.	

	client session, specified in the rules of the organizer according to Art. 17, para. 1, item 4 of the Gambling Act. The CCS shall specify the conditions under which the participant's access may be renewed.		
2.	Employee access 2.1. The online betting organizer shall establish a procedure for determining the levels of access to CCS by employees, consultants or third parties depending on the nature of the duties assigned to them and in accordance with the concluded contracts with them.	The functions are performed by the CCS of the organizer. The access to the administrative functions of the game server is performed only by pre-defined users with precisely defined levels of authorization. The game server does not allow administration through the CCS of the organizer, except for the function of activating or deactivating games and bonuses for the participants in the games from the system.	
	2.2. The organizer of online betting shall implement a procedure for immediate suspension of access to CCS by employees, consultants or third parties with whom the organizer has terminated contractual relations.	The functions are performed by the CCS of the organizer. The access to the administrative functions of the game server is performed only by pre-defined users with precisely defined levels of authorization. The game server does not allow administration through the CCS of the organizer, except for the function of activating or deactivating games and bonuses for participants in the games from the system.	
	2.3. The Central Computer System shall have strict restrictions on special rights and privileges regarding the access of employees, consultants or third parties authorized to disclose information about participants and gaming accounts.	The functions are performed by the CCS of the organizer. The access to the administrative functions of the game server is performed only by pre-defined users with precisely defined levels of authorization.	
	2.4. The Central Computer System shall maintain accounts of employees, consultants or third authorized persons with differentiated access rights and privileges.	The functions are performed by the CCS of the organizer. The access to the administrative functions of the game server is performed only by pre-defined users with precisely defined levels of authorization.	
	2.5. The Central Computer System shall control the setting and distribution of passwords and access rights to employees, consultants or third parties.	The functions are performed by the CCS of the organizer. The game server does not allow administration through the CCS of the organizer, except for the function of activating or deactivating games from the system.	

3.	Additional requirements for access 3.1. The Central Computer System shall have access to the network functions, and employees shall have gone through the process of identification, authorization and verification before obtaining access to the network functions.	The functions are performed by the CCS of the organizer	
	3.2. The Central Computer System shall not allow unauthorized internal access or access by participants to network functions.	The functions are performed by the CCS of the organizer.	
	3.3. Each user shall have a unique username or identification number that cannot be used by another person.	The functions are performed by the CCS of the organizer	
	3.4. Routing management functions shall be applied to control access to important system components.	The functions are performed by the CCS of the organizer	
	3.5. The Central Computer System shall not allow unauthorized persons to install equipment or software that may bypass the system controls and validity controls in the CCS.	The functions are performed by the CCS of the organizer	
	3.6. All operating systems and installations in the CCS shall be limited, as far as possible, to basic (safe) functions.	The functions are performed by the CCS of the organizer.	
4.	The system management by the CCS, the groups of participants and the system software shall be in separate networks.	The functions are performed by the CCS of the organizer.	
5.	Gambling games operators shall apply procedures to control access to the operating system, software, information and security.	The functions are performed by the CCS of the organizer. Access to the administrative functions of <i>Elephant RGS</i> (Remote Game Server) version <i>GS 5.1</i> is performed only by users with precisely defined levels of authorization. Access to the administrative functions of the <i>RGS QA Server</i> module requires additional separate authorization. The system does not allow administration through the CCS of the organizer, except for the function of activating or deactivating games. The access of the organizer's users to the system requires the necessary prior authorization.	
6.	All keys and encryption codes are stored on a secure storage medium with enhanced data protection.	The functions are performed by the CCS of the organizer. All keys and encryption codes used by <i>Elephant RGS</i> (Remote Game Server) version <i>GS 5.1</i> are stored in accordance with the requirements of ISO/IEC 27001:2013.	
7.	Vulnerability tests	The functions are performed by the	

	7.1. The Central Computer System shall pass vulnerability and intrusion tests, which shall include all public interfaces that store, process and communicate client information, game participation data and financial information.	CCS of the organizer. The manufacturer CT Interactive has a valid certificate for compliance with the requirements of ISO/IEC 27001:2013.	
	7.2. The vulnerability tests under items 6.1 shall be performed every three months, and for intrusion - at least once a year.	The functions are performed by the CCS of the organizer. Information about the tests of the 7MOJOS SLOTS 22-4M/2020 system is available in the Test Reports section. The manufacturer CT Interactive has a valid certificate for compliance with the requirements of ISO/IEC 27001:2013 and performs the necessary tests on its server <i>Elephant RGS</i> (Remote Game Server) version <i>GS 5.1</i> .	
	7.3. The Central Computer System shall generate a report on the performed tests under item 6.1.	The functions are performed by the CCS of the Organizer	
	7.4. The generation of the reports from the CCS, indicated in the methodology, shall be done on the basis of a request from the control bodies of the NRA.	The functions are performed by the CCS of the organizer. The <i>Elephant RGS</i> (Remote Game Server) version <i>GS 5.1</i> provides the CCS with the necessary information to properly generate the reports. All servers on the server allow the generation of reports in CSV or xlsx formats using filters for a selected time interval via the “Display report” button from the menu.	

6.2. Registration and identification of participants

Elephant RGS (Remote Game Server) version GS 5.1 gaming software does not perform participant registration and identification functions. The gaming software automatically provides the necessary information for the proper functioning of the system, processing and returning each request individually according to the identification codes sent by the CCS and using unique MGS Player ID for each user. Elephant RGS (Remote Game Server) version GS 5.1 does not use electronic means of communication and SMS messages.

7. Automated submission of information to the National Revenue Agency (NRA)

The gaming software on the server does not perform functions for submitting information to the NRA. The server automatically provides the necessary information for proper operation of the system.

8. Remote data access. Control Local Server (CLS)

The gaming software of Elephant RGS (Remote Game Server) version GS 5.1 automatically provides the necessary information about the running games and the operation of the storage system in CLS or CCS of the organizer, which organizes the remote access. The sent data and all data on the implementation of the games are stored in the Data Centre by the system and are archived according to the manufacturer’s procedure.

9. Rules of the games

Elephant RGS/Remote Game Server) version GS S-1: 00109 - gambling machine games
(Gaming software for games with virtual gambling machines)

The gaming software of communication equipment for online betting *Elephant RGS (Remote Game Server) version GS 5.1*, manufactured by CT Interactive, is a modified version of the gaming software *Elephant RGS (Remote Game Server) version GS 4.8*, manufactured by CT Gaming AD, (Test Report No. KC-072 / 04.06.2021 of the Gaming Facilities Testing Laboratory at the Bulgarian Institute of Metrology).

As of 01.03.2021, "CT Gaming AD" transfers all rights for production and distribution of the gaming software to the manufacturer "CT Interactive EOOD".

The server's gaming software provides access to one or more of the following games provided by the previous version of GS 4.8, subject to the prior authorization of the Central Computer System of the organizer of online gambling games:

20 Dice Party - video gambling game with five reels, three visible positions of each reel; up to 20 betting lines; formation of winning combinations from left to right along the lines. Maximum winning in the main game - 1000 times the bet per line; substituting WILD symbol - "Joker" - appearing on all reels and substituting for all symbols except the SCATTER symbol; SCATTER symbol - "Lucky Dice" - winnings up to 500 times the total bet depending on the number of visible symbols on the screen, regardless of their location on the lines and whether they are adjacent or not.

20 Mega Dice - video gambling game with five reels, three visible positions of each reel; up to 20 betting lines; formation of winning combinations from left to right along the lines. Maximum winning per line in the main game - 1000 times the bet per line; substituting WILD symbol - "Joker" - appearing on all reels and substituting for all symbols except the SCATTER symbol; SCATTER symbol - "Star" - winnings up to 500 times the total bet depending on the number of visible symbols on the screen, regardless of their location on the lines and whether they are adjacent or not.

20 Mega Slots - video gambling game with five reels, three visible positions of each reel; up to 20 betting lines; formation of winning combinations from left to right along the lines. Maximum winning in the main game - 1000 times the bet per line, substituting WILD symbol - "7" - appearing on all reels and substituting for all symbols except the SCATTER symbol; SCATTER symbol - "Star" - winnings up to 500 times the total bet depending on the number of visible symbols on the screen, regardless of their location on the lines and whether they are adjacent or not.

20 Roosters - video gambling game with five reels, three visible positions of each reel; up to 20 betting lines; formation of winning combinations from left to right along the lines. Maximum winning in the main game - 1000 times the bet per line; substituting WILD symbol - "Rooster" - appearing on all reels and substituting for all symbols except the SCATTER symbol; SCATTER symbol - "Egg" - winnings up to 500 times the total bet depending on the number of visible symbols on the screen, regardless of their location on the lines and whether they are adjacent or not.

20 Shining Coins - video gambling game with five reels, three visible positions of each reel; up to 20 betting lines; formation of winning combinations from left to right along the lines. Maximum winning in the main game - 1000 times the bet per line; substituting WILD symbol - "Coin" - appearing on all reels and substituting for all symbols except the SCATTER symbol; SCATTER symbol - "Star" - winnings up to 500 times the total bet depending on the number of visible symbols on the screen, regardless of their location on the lines and whether they are adjacent or not.

20 Star Party - video gambling game with five reels, three visible positions of each reel; up to 20 betting lines; formation of winning combinations from adjacent identical symbols from left to right on the active lines, starting from the leftmost reel. Substituting WILD symbol - "7", substituting for all symbols except the SCATTER symbol "Star". SCATTER symbol - "Star" - winnings up to 500 times the total bet, depending on the number of visible symbols on the screen, regardless of their location on the lines. Maximum winning in the main game - 1000 times the bet per line.

3 Towers - video gambling game with five reels, three visible positions of each reel; up to 21 betting lines; formation of winning combinations from left to right on the lines. Maximum winning in the main game - 5000 times the bet per line. Special symbol "Crown" - performs the functions of a substituting WILD symbol and

substituting for all symbols of its own position and the SCATTER symbol - winnings up to 200 times the total bet depending on the number of visible symbols on the screen, regardless of their location on the lines, whether they are adjacent or not. Three or more symbols on the screen starts a bonus game Free Games - 10 free games. Before they start, the player chooses one of the three symbols - "Tower bow", "Tower catapult" or "Tower cannon", which becomes an additional substituting symbol of type Expanded WILD during the free games, making visible all positions on the reel where it has appeared, including the WILD, and substituting for all symbols except the SCATTER symbol - "Crown". Each "Crown" symbol that appears on the screen during free games gives an additional winning equal to the total bet. Additional 10 free games are won three or more "Crown" symbols on the screen during free games.

30 Treasures - video gambling game with five reels, three visible positions of each reel; up to 30 betting lines; formation of winning combinations from left to right along the lines. Maximum winning in the main game - 1000 times the bet per line; substituting WILD symbol - "Lion" - substituting for all symbols except the SCATTER symbol; SCATTER symbol - "Star" - winnings up to 500 times the total bet depending on the number of visible symbols on the screen, regardless of their location on the lines and whether they are adjacent or not,

40 Brilliants - video gambling game with five reels, four visible positions of each reel; up to 40 betting lines; formation of winning combinations from adjacent identical symbols from left to right on the active lines, starting from the leftmost reel. Substituting WILD symbol - "Coin" - appearing only on the 2nd, 3rd and 4th reels, substituting for all symbols except the SCATTER symbol; SCATTER symbol - "Star" - winnings up to 500 times the total bet depending on the number of visible symbols on the screen, regardless of their location on the lines and whether they are adjacent or not. Maximum winning per line in the main game - 1000 times the bet per line.

40 Diamond Treasures - video gambling game with five reels, four visible positions of each reel; up to 40 betting lines; formation of winning combinations from adjacent identical symbols from left to right on the active lines, starting from the leftmost reel. Substituting WILD symbol - "King" - appearing only on the 2nd, 3rd, and 4th reels and substituting for all symbols except the SCATTER symbol "Chest". SCATTER symbol - "Chest" - winnings up to 500 times the total bet, depending on the number of visible symbols on the screen, regardless of their location on the lines. Maximum winning per line in the main game - 1000 times the bet per line.

40 Dice Treasures - video gambling game with five reels, four visible positions of each reel; up to 40 betting lines; formation of winning combinations from left to right along the lines. Maximum winning in the main game - 1000 times the bet per line; substituting WILD symbol - "Joker" - appearing on 2nd, 3rd and 4th reels and substituting for all symbols except the SCATTER symbol; SCATTER symbol - "Lucky Dice" - winnings up to 500 times the total bet depending on the number of visible symbols on the screen, regardless of their location on the lines and whether they are adjacent or not.

40 Mega Dice - video gambling game with five reels, four visible positions of each reel; up to 40 betting lines; formation of winning combinations from left to right along the lines. Maximum winning in the main game - 1000 times the bet per line; substituting WILD symbol - "Joker" - appearing on all reels and substituting for all symbols except the SCATTER symbol; SCATTER symbol - "Lucky Dice" - winnings up to 500 times the total bet depending on the number of visible symbols on the screen, regardless of their location on the lines and whether they are adjacent or not.

40 Mega Slot - video gambling game with five reels, four visible positions of each reel; up to 40 betting lines; formation of winning combinations from adjacent identical symbols from left to right on the active lines, starting from the leftmost reel. Substituting WILD symbol - "7" - substituting for all symbols except the SCATTER symbol. SCATTER symbol - "Star" - winnings up to 500 times the total bet, depending on the number of visible symbols on the screen, regardless of their location on the lines. Maximum winning per line in the main game - 1000 times the bet per line.

40 Roosters - video gambling game with five reels, four visible positions of each reel; up to 40 betting lines; (formation of winning combinations from left to right on the lines. Maximum winning in the main game - 1000 times the bet per line; substituting WILD symbol - "Rooster" - appearing on all reels and substituting for all symbols except the SCATTER symbol; symbol type " SCATTER "-" Egg "-" - winnings up to 500 times the total bet depending on the number of visible symbols on the screen, regardless of their location on the lines and whether they are adjacent or not.

40 Shining Coins - video gambling game with five reels, four visible positions of each reel; up to 40 betting lines; formation of winning combinations from left to right along the lines. Maximum winning in the main game - 1000 times the bet per line; substituting WILD symbol - "Coin" - substituting for all symbols except; SCATTER symbol - "Star" - winnings up to 500 times the total bet depending on the number of visible symbols on the screen, regardless of their location on the lines and whether they are adjacent or not.

40 Shining Jewels - video gambling game with five reels, four visible positions of each reel; up to 40 betting lines; formation of winning combinations from left to right along the lines. Maximum winning in the main game - 1000 times the bet per line; substituting WILD symbol - "Crown" - appearing only on the 2nd, 3rd and 4th reels and substituting for all symbols except the SCATTER symbol; SCATTER symbol - "Chest" - winnings up to 500 times the total bet depending on the number of visible symbols on the screen, regardless of their location on the lines.

40 Treasures - video gambling game with five reels, four visible positions of each reel; up to 40 betting lines; formation of winning combinations from adjacent identical symbols from left to right on the active lines, starting from the leftmost reel. Substituting WILD symbol - "King" - appearing only on the 2nd, 3rd, and 4th reels and substituting for all symbols except the SCATTER symbol "Chest". SCATTER symbol - "Chest" - winnings up to 500 times the total bet, depending on the number of visible symbols on the screen, regardless of their location on the lines. Maximum winning in the main game - 1000 times the bet per line.

50 Dice Treasures - video gambling game with five reels, four visible positions of each reel; up to 50 betting lines; formation of winning combinations from left to right along the lines. Maximum winning in the main game - 1000 times the bet per line; substituting WILD symbol - "Joker" - appearing on 2nd, 3rd and 4th reels and substituting for all symbols except the SCATTER symbol; SCATTER symbol - "Lucky Dice" - winnings up to 500 times the total bet depending on the number of visible symbols on the screen, regardless of their location on the lines and whether they are adjacent or not.

50 Shining Jewels - video gambling game with five reels, four visible positions of each reel; up to 50 betting lines; formation of winning combinations from adjacent identical symbols from left to right on the active lines, starting from the leftmost reel; substituting WILD symbol - "Crown" - appearing only on the 2nd, 3rd, and 4th reels and substituting for all symbols except the SCATTER symbol. SCATTER symbol - "Star" - winnings up to 500 times the total bet, depending on the number of visible symbols on the screen, regardless of their location on the lines. Maximum winning per line in the main game - 1000 times the bet per line,

50 Treasures - video gambling game with five reels, four visible positions of each reel; up to 50 betting lines; formation of winning combinations from adjacent identical symbols from left to right on the active lines, starting from the leftmost reel. Substituting WILD symbol - "Queen" - appearing only on the 2nd, 3rd, and 4th reels and substituting for all symbols except the SCATTER symbol "Chest". SCATTER symbol - "Chest" - winnings up to 500 times the total bet, depending on the number of visible symbols on the screen, regardless of their location on the lines. Maximum winning per line in the main game - 1000 times the bet per line.

African Magic - video gambling game with five reels, three visible positions of each reel; up to 25 betting lines; formation of winning combinations from adjacent identical symbols from left to right on the active lines, starting from the leftmost reel. Two "WILD" symbols - "Woman" and Wildx2 "Eye" symbol, which appears in the main game on the 4th and 5th reels, and in free games only the 4th reel; all winnings with one symbol "Eye" is multiplied by X2, and multiplied by X4 in case of two such symbol; SCATTER symbol - "African Hut", appearing only on the 3rd, 4th and 5th reels, with three visible symbols "African Hut" on the screen, regardless of their location on the lines - bonus game "Free Games" - 15 free games with multiplication of winnings X2. When three visible symbols "African Hut" appear on the screen during free games, an additional 15 free games are won with the same multiplier and the free games until the end are played as "Super Games" - free games in which only the high symbols "Mask", "Woman" and "Eye" participate. The reels in paid and free games are different. Maximum winning in the main game - 10,000 times the bet per line,

Alaska Wild - video gambling game with five reels, four visible positions of each reel; up to 50 betting lines; formation of winning combinations from adjacent identical symbols from left to right on the active lines, starting from the leftmost reel. Substituting WILD symbol - "Bear", substituting for all other symbols except the SCATTER. SCATTER symbol - "Flower" on the 2nd, 3rd and 4th reels, with 3 visible "Flower" symbols on the screen, regardless of their location on the lines - bonus game "Free Games" - 5 free games with the chance of winning additional free games. Maximum winning in the main game - 1000 times the bet per line.

Amazons Spear - video gambling game with five reels, three visible positions of each reel; up to 25 betting

lines; formation of winning combinations from left to right along the lines. Maximum winning in the main game - 2000 times the bet per line; substituting WILD symbol - "Spear" - appearing only on the 2nd, 3rd and 4th reels and substituting for all symbols except the SCATTER symbol; SCATTER symbol - three or more visible symbols on the screen, regardless of their location on the lines, additional winnings up to 100 times the total bet and bonus game - 15 free games; new free games can be won during free games

American Gigolo - video gambling game with five reels, three visible positions of each reel; up to 30 betting lines; formation of winning combinations from adjacent identical symbols from left to right on the active lines, starting from the leftmost reel. "WILD" symbol on the 2nd, 3rd, 4th and 5th reels - substituting for all symbols except the SCATTER. SCATTER symbol - "Heart" - winnings up to 50 times the total bet depending on the number of visible symbols on the screen, regardless of their location on the lines; three or more visible symbols on the screen - bonus game "Free Games" - 12 free games with the chance to win additional free games. Maximum winning in the main game - 500 times the bet per line,

Australian Magic - video gambling game with five reels, three visible positions of each reel; up to 25 betting lines; formation of winning combinations from adjacent identical symbols from left to right on the active lines, starting from the leftmost reel. Two types of WILD substituting symbols - "Girl" on the 4th and 5th reels in the main game and only on the 4th reel in "Free Games" and "Super Games" - substituting for all symbols except the SCATTER symbol; each "Girl" symbol that participates in a winning combination doubles it (for 2 symbols in one combination - X4) and "Man" - substituting for all symbols except the SCATTER symbol and "Girl". SCATTER symbol on 3rd, 4th and 5th reels - with three visible symbols on the screen, regardless of their location on the lines - winnings of 5 times the total bet and bonus game "Free Games" - 15 free games with doubling of all winnings and receiving additional free games. The additional free games are played as "Super Games" - only the four highest symbols on the reels and "Man" for all reels and "Girl" for the 4th reel. Maximum winnings in main game - 10,000 times the bet per line,

Aztec Empress - video gambling game with five reels, three visible positions of each reel; up to 15 betting lines; formation of winning combinations from adjacent identical symbols from left to right on the active lines, starting from the leftmost reel. Substituting WILD symbol - substituting for all symbols except the SCATTER symbol, doubling the winnings from the winning combination; SCATTER symbol - "Star" - winnings up to 100 times the total bet depending on the number of visible symbols on the screen, regardless of their location on the lines; three or more symbols on the screen - bonus game - 15 free games with multiplier of X3 for all winnings, except the highest; new free games can be won during free games. Maximum winning in the main game - 10,000 times the bet per line

Banana Dice Party - video gambling game with five reels, three visible positions of each reel; up to 25 betting lines; formation of winning combinations from left to right along the lines. Maximum winning in the main game - 1000 times the bet per line; substituting WILD symbol - "Joker" - appearing on all reels and substituting for all symbols except the SCATTER symbol; SCATTER symbol - "Dice" - winnings up to 500 times the total bet depending on the number of visible symbols on the screen, regardless of their location on the lines and whether they are adjacent or not.

Banana Party - video gambling game with five reels, three visible positions of each reel; up to 25 betting lines; formation of winning combinations from adjacent identical symbols from left to right on the active lines, starting from the leftmost reel. Substituting WILD symbol - substituting for all symbols except the SCATTER symbol; SCATTER symbol - winnings up to 500 times the total bet depending on the number of visible symbols on the screen, regardless of the location of the yin on the lines and whether they are adjacent or not. Maximum winning in the main game - 1000 times the bet per line.

Bavarian Forest - video gambling game with five reels, three visible positions of each reel; up to 25 betting lines; formation of winning combinations from adjacent identical symbols from left to right on the active lines, starting from the leftmost reel; substituting WILD symbol - "The Bear", substituting for all other symbols except the SCATTER symbol. SCATTER symbol - "The Hunter", appearing only on the 3rd, 4th and 5th reels, with three visible symbols "The Hunter" on the screen, regardless of their location on the lines - bonus game "Free Games" - 15 free games. When 3 visible "The Hunter" symbols first appear on the screen during free games, an additional 100 free games are won once. Maximum winning in the main game - 15,000 times the bet per line.

Beetle Star - video gambling game with five reels, three visible positions of each reel; up to ten betting lines; formation of winning combinations from adjacent identical symbols from left to right on the active lines,

starting from the leftmost reel. Substituting WILD symbol - substituting for all symbols except the SCATTER symbol, doubling the winnings from the winning combination; SCATTER symbol - "Star" - winnings up to 100 times the total bet depending on the number of visible symbols on the screen, regardless of their location on the lines; three or more symbols on the screen - bonus game - 15 free games with multiplier of X3 for all winnings, except the highest; new free games can be won during free games. Maximum winning in the main game - 15,000 times the bet per line.

Big Joker - video gambling game with five reels, three visible positions of each reel; up to 5 betting lines; formation of winning combinations from left to right along the lines. Bingo Best - a bingo game, electronic drawing in random order of 30 balls with the numbers from "1" to "60"; the player can use from 1 to 4 cards with 15 numbers, the combinations of numbers can be changed via a button from the user interface; winnings are paid for one, two lines and bingo, as well as for the formation of certain geometric shapes from known numbers on the card. The winnings are fixed according to the bet made on the card. After drawing 30 balls, the corresponding numbers are marked on the active cards. Bonus game "Extra Balls" - if with the help of only one extra ball, the player can make a winning combination, other than the three smallest in value, the player has the chance to draw an extra ball. Drawing an extra ball may be free of charge or may require additional payment, which may be different for each subsequent ball and depends on the expected winnings. A maximum of 10 extra balls can be drawn in one game. If there is no combination in which an extra ball can be given, all 10 extra balls are drawn or the player has drawn an extra ball and does not want to draw another, he is paid all combinations that have at least one different number. Maximum winning in the main game - 1500 times the bet on a card.

The following games are removed after the modification: *Virtual Roulette, Bingo Fast, Jester Bingo,*

Bingo King's Tomb Riches, 90 Balls Bingo 4 Cards, 90 Balls Bingo 6 Cards.

Wild Clover Dice - video gambling game with five reels, three visible positions of each reel; up to 20 betting lines; formation of winning combinations from adjacent identical symbols from left to right on the active lines, starting from the leftmost reel. Maximum winning in the main game - 1000 times the bet per line. Substituting WILD symbol - “Joker” - appearing only on 2nd, 3rd and 4th reels, substituting for all symbols except the SCATTER symbol. SCATTER symbol - “Lucky dice” - winnings up to 500 times total bet depending on the number of visible symbols on the screen, regardless of their location on the lines and whether they are adjacent or not.

General conditions for playing of the games:

The position of symbols on reels in free and paid games is different. The number of lines and the bet on the line during free games is the same as the last paid game that triggered the free games.

All games allow doubling of winnings in additional card game Red/Black X2, Suit X4 and the player chooses what part of the winning to bet for doubling. The limits for participation in the doubling game are described in the rules of each game.

The games provide the option for automatic play Autoplay (via a button on the screen), and the player can pre-select the number of consecutive games in this mode.

Through the CCS of the organizer, the server provides the player with the opportunity to choose the

value of one credit in the respective currency by a button on the screen for playing a game or on the home page of the game. The homepage requires explicit confirmation of the selected denomination if more than one is active.

The premium jackpot of type Mystery with up to 4 premium levels: LEAD, BRONZE, SILVER, GOLD, each of the levels with own initial value, initial and final value for winning, percentage of allocation and option for limiting the bet for accumulation and winning is administered, set up, formed and distributed through the **RGS Buffalo JP Server** software module that is common to all users of a single website. The module visualizes the current values of the premium only on the screens of the games that participate in its formation and distribution.

The premium jackpot “HOT LUCK” of type Mystery with 3 progressive premium levels: Mini (Bronze), Major (Silver)) and Mega (Gold), each of the levels with its own initial value, initial and final value for winning, percentage of allocation and option for limiting the bet for accumulation and winning and one bonus scatter level HOT LUCK (Lead) with a value fixed at the initial levels is administered, set up, formed and distributed through the **RGS Buffalo JP Server** software module that is common to all users of a single website. The module displays the current values of the progressive bonus levels only on the screens of the games that participate in its formation and distribution.

Progressive levels are won depending on the results of a bonus game, which is launched at random, interrupting the main game, for one of the active users. Starting the game guarantees winning one of the progressive levels. The screen displays 30 gold bars, from which the player chooses one by one. Each of the bars may contain gems corresponding to one of the three progressive levels or contain nothing. After the player collects 4 identical symbols, he wins the sum for the respective progressive level. The player’s time for selecting the ingots is limited and is set in the jackpot settings. Once the time has elapsed and the player has not selected 4 identical symbols, the selection is completed automatically and the player receives the corresponding winning.

SCATTER winnings are promotional bonuses that are distributed among players after winning at least one of the three progressive levels of the Mystery Jackpot. The total amount of distributed bonuses is set in the jackpot settings and is equal to the current value at the HOT LUCK (Lead) level set in the initial settings. The value is visualized in the rules of each game that participates in its distribution. After winning a progressive level, the image of a thermometer on the right side of the screen fills up to the top and the inscription “ACTIVE” appears on it, which means that the scatter mode for distributing additional winnings is activated. The thermometer is filled depending on the activity of the players and the increase of the accumulations in the progressive levels. The size of the single scatter winning (can be a random value within certain limits) and the frequency of its appearing is determined in the initial settings. In the following consecutive games, each of the active participants can win an additional bonus in the specified amount until the full total value of the level is paid out in full. For each progressive level won, one of the pre-defined winnings is distributed. After paying the full amount, the inscription “ACTIVE” on the thermometer disappears and no additional amounts are paid.

Each of the games can be subscribed to only one of the bonus sets administered by the **RCS Buffalo JP Server** module. The administration of the **RGS Buffalo JP Server** software module is performed through the **RCS Buffalo** application, which requires additional authorization.

10. Basic requirements for system servers

10.1. Software: Linux OS.

Checksums of the individual games in **Elephant RGS (Remote Game Server)** version **GS 5.1** are available through the **RGS Reports** application, **Server Certs/Certificates Status** menu when selecting **Elephant GS 5.1 All Games - Display report** (also available through the **RGS Monitor** application, **Server version** menu):

The checksum of the **RCS Buffalo JP Server** module for jackpot formation is available through the **RGS Reports** application, **Buffalo Reports/Version** menu (they are also available through the **RGS Buffalo** application, **Version** menu upon authorization):

Version: 1.5

Checksum (MD5): b0c87fae0433dd6ea5b27a5dff5c1d33

10.2. Connectivity. Minimum internet connection to the Central server:
from 1 to 10 MbitsX2 Symmetric Internet Channel

10.3. Minimum technical requirements for servers:

Application server - 54 vCPU, 64GB RAM, 240GB SAS.

Server databases - 24 vCPU, 32GB RAM, 13900GB SAS storage space, 790GB SSD,

CDN server - 1vCPU, 4GB RAM, 200GB SAS,

The servers are installed in a VMware environment with a “Fail over” procedure. The NAKIVO system automatically backs up data to a local NAS.

10.4. Control Local Server (CLS)

The gaming software of **Elephant RGS (Remote Game Server)** version **GS 5.1** automatically provides the necessary information about the games and the operation of the storage and processing system in the CLS or CCS of the organizer.

10.5. Means of access for participants

Elephant RGS (Remote Game Server) version **GS 5.1** provides access to participants through the CCS of the organizer via a website and Internet connectivity from a device that supports Internet access.

The test was performed through authorized access with unique identification keys for the user and administrative parts of the system.

CONCLUSION

Gaming software and communication equipment for organizing online betting

Name *Elephant RCS (Remote Game Server)* version *GS 5.1*
Manufacturer *CT Interactive*

PASSES the test and fulfils the requirements of Chapters three, four, five, six, eighth and ninth of the **Ordinance on the General Technical and Functional Requirements for Gaming Software and Communication Equipment for Online Betting**, Decree of the Council of Ministers No. 31 of 01.02.2021, promulgated in State Gazette No. 10 of 05.02.2021, and **Ordinance on the Terms and Conditions for Registration and Identification of Participants, Data Storage for Online Betting Organized on the Territory of the Republic of Bulgaria and for Submission of Information on Gambling Games to a Server of the National Revenue Agency**, Directive of the Council of Ministers No. 50 of 15.02.2021, promulgated in State Gazette No. 14 of 17.02.2021.

Notes:

1. Environmental conditions during the test:
 - temperature: $25.1^{\circ}\text{C} \div 30.9^{\circ}\text{C}$;
 - relative humidity: $27.6\text{ rh}\% \div 47.5\text{ rh}\%$.(Thermo-Hygrometer TESTO 608-H1, Serial No. W45062265)
2. Results relate only to test sample. The declaration of conformity reported in the conclusion shall be based only on the test results of the submitted sample, as set out in this Protocol. The declaration of conformity reported in the conclusion applies only to the cited sections of the mandatory requirements applicable to the gaming machine.
3. Referrals to the Protocol are allowed only in its entirety. Excerpts of the test report cannot be made without written consent of the Testing Laboratory.
4. The laboratory is not responsible for the completeness and correctness of circumstances declared by the manufacturer and the applicant.

I, the undersigned Ivan Nikolaev Gospodinov, hereby certify the genuineness of the present translation done by me from Bulgarian into English of the document attached hereto – “Copy of a Protocol of Testing of Gaming Software and Communication Equipment for Online Betting No. KC-075 of 30.07.2021”. The translation consists of 61 pages.

Translator: Ivan Nikolaev Gospodinov
